DESCRIPTION

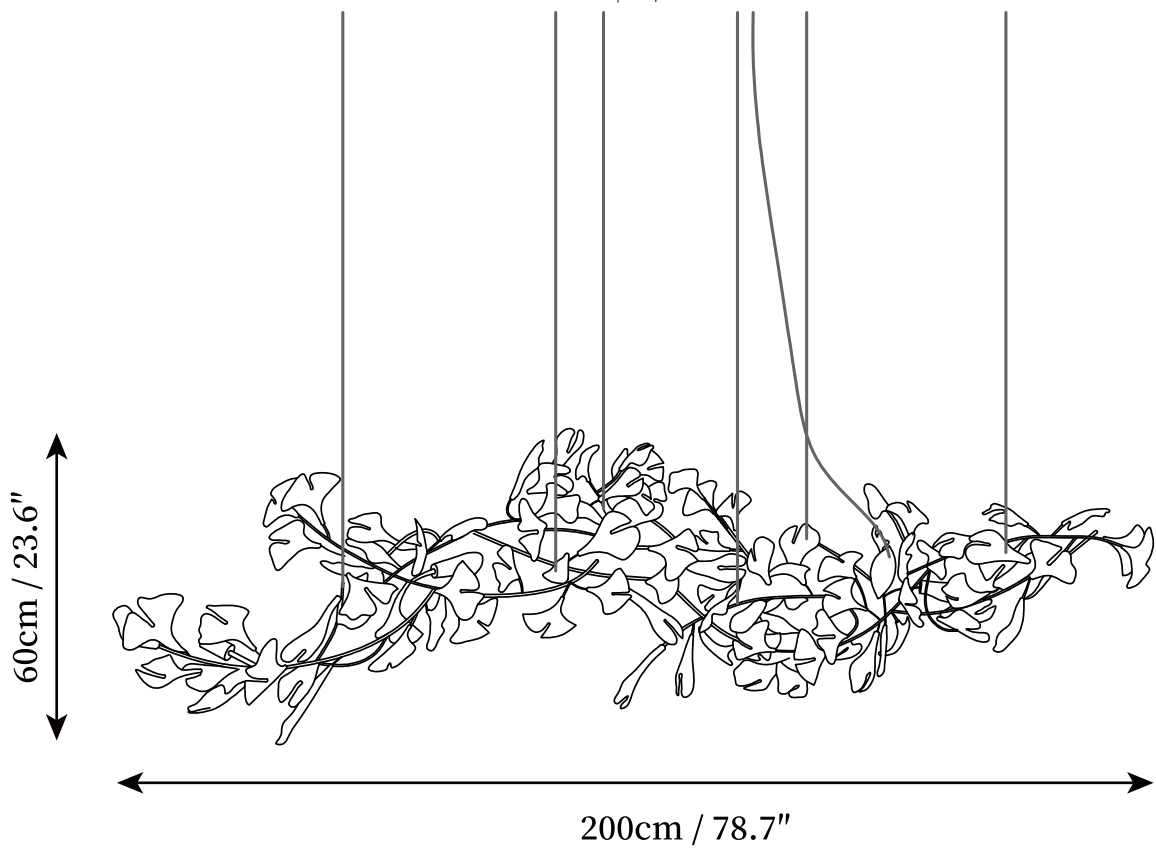

This ceramic ginkgo tree petal chandelier shows its luxurious style in overall design, material, and manufacturing technology. The metal lamp body is covered with exquisite ceramic petals, which reflects the perfect combination of lighting design and natural plants.

Ginkgo Chandeliers are impressive bespoke installations, composed of handcrafted porcelain leaves. The interplay between ceramic and light has the power to create a sense of wellbeing and warm atmosphere. The light sculpture goes much further than its functional purpose of lighting a space. By illuminating itself, it defines its own shape and presence, becoming a mesmerizing artwork. Like a living plant, it has a natural, dynamic energy that both calms and revitalizes us. The design of the installations is going hand in hand with the architectural space and with the ideas of the architects and interior designers.
