

# Kasa Pendant Lamp

---

THECARGOODS.COM

SUPPORT@THECARGOODS.COM

## DESCRIPTION

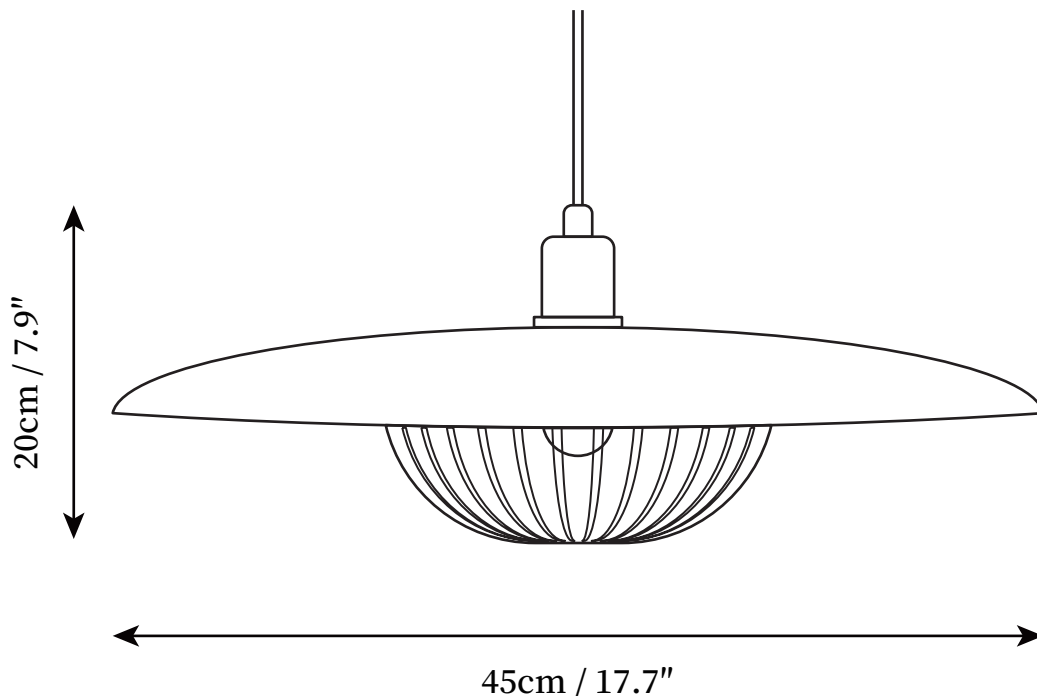

We applied knowledge about the wood furniture industry to produce the Kasa lamp. We use 50mm thick precious wood plates and combined. The lampshades are engraved by CNC machines and hand sanded. The thinnest part of the lampshade is only 4mm with a smooth edge. The fine details make this lamp look like an art piece.

In 60 minutes, four pieces of solid wood Kasa lampshades can be produced by a 5-axis CNC machine. We can set up more machines to increase production numbers. Moreover, by choosing an LED light source and controlling the gradual change of the thickness of the wood lampshade, we made this art piece into a stable product to sell on the market.

## SPECIFICATION DETAILS
